

Project Initialization and Planning Phase

Date	11 July 2026
Team ID	
Project Name	A Comprehensive Measure of Well-Being
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love. A well-articulated customer problem statement allows you and your team to find the ideal solution for your customers' challenges. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

Example:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A Government Policy Maker	Identify countries with low human development and allocate resources effectively	It is difficult to analyze large amounts of HDI data manually	HDI depends on multiple indicators such as life expectancy, education, and GNI, making analysis complex.	Unable to make quick and effective policy decisions

PS-2	A Research Analyst	Compare the development level of different countries	Collecting and processing data from multiple sources takes a lot of time	The data is large, scattered, and requires preprocessing before analysis	Less efficient and more prone to errors
PS-3	An NGO Organization	Identify underdeveloped countries for planning welfare programs	There is no quick prediction system available	Manual analysis is slow and requires technical expertise	Delayed in making timely decisions
PS-4	A Student/Researcher	Learn how HDI prediction works using Machine Learning	Finding real-world datasets and building ML models is challenging	Most available resources are theoretical and not implementation-focused	Unable to gain practical experience
