Project Name	A Comprehensive Measure of Well-Being
Maximum Marks	4 Marks

Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS	THINKS
• I need an easy way to predict the Human Development Index of countries. • The prediction should be accurate and reliable. • The system should help me make faster development decisions.	• Which factors have the greatest impact on HDI? • Can Machine Learning improve prediction accuracy? • Can Machine Learning improve prediction accuracy?

	<i>Government Policy Maker (Government Planning Officer)</i>	
DOES • Collects HDI data from UNDP and World Bank reports. • Compares education, health, and income indicators. • Uses reports to plan development programs		FEELS •Frustrated by time-consuming manual analysis. • Concerned about making the right policy decisions. • Confident when using an accurate prediction system.
